ANILOX ROLL COVERS

Anilox rollers are a key component within the flexo printing process and are high value assets. It's important they are kept in the best condition to prevent costly replacement orders or quality issues on press. With our range of anilox roll covers, you can be sure your anilox is well protected. All our roll covers are custom made to fit your rollers.

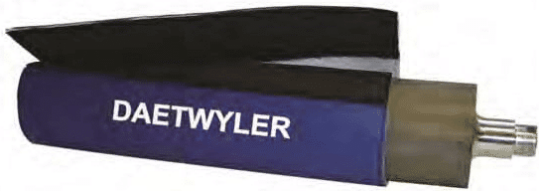

STANDARD ANILOX COVER

Provides 50 times the protection of a bare roll

3-ply industrial material consisting of a thick blue vinyl outer layer, a foam core and a soft internal layer. Velcro fasteners allow the cover to be kept tight on the rollers. A clear vinyl identification window is included on every cover (not shown in the picture).

Please supply roll diameter and length for your custom quote.

Article number: C-DUSA-STANDARD

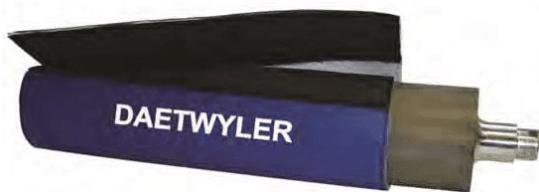

ULTIMA ANILOX COVER

Provides 125 times the protection of a bare roll

The same material as the Standard cover but with additional padding bonded to the internal layer.

Please supply roll diameter and length for your custom quote.

Article number: C-DUSA-ULTIMA

PROTECT YOUR ANILOX.

PROTECT YOUR BOTTOM LINE.
