

MDC DOCTOR BLADE GLOVES

Our Doctor Blade Gloves are meticulously crafted for application within flexographic and rotogravure pressrooms. These gloves offer a valuable advantage when it comes to safely handling steel and plastic doctor blades, while adhering to global standards for ANSI/ISEA Level A7 cut resistance and EN 388 (4X43F).

LEVEL A7 / F CUT RESISTANCE GLOVES

Made to shield users in environments where there is a high risk of cuts and abrasions, the Level A7 / F Cut Resistance Gloves are a durable yet lightweight pair of handling gloves. They achieve the highest levels of cut and abrasion resistance according to the newest EN standards, are double dipped in nitrile for added resilience, and have textured palms for better grip and safer handling.

KEY FEATURES AND BENEFITS

- ✓ Double nitrile coated handling gloves
- ✓ Gloves offer outstanding protection against abrasions, cuts and scrapes
- ✓ Stretchy, ergonomic design offers excellent fit and dexterity
- ✓ Textured 'sandy' nitrile coating offers excellent grip in wet and dry settings
- ✓ High performance polyethylene (HPPE) and glass fibre liner adds cut resistance
- ✓ Snug fitting, uncoated wrist prevents dirt from entering the gloves
